

PVC Ambulators

PVC Ambulators are especially useful for pools or showers. You can really take these walkers anywhere. PVC is easy to clean as well.

PVC Ambulators

This ambulatory is completely constructed of PVC pipes for easy cleaning, durability, & strength. All styles of these great products are rustproof, waterproof, and built to last. PVC Material is easy to clean and to keep clean. If you've ever wanted to enjoy soaking in a pool but you need extra help, this product is perfect for you. These easy rolling, lightweight chairs are easy to move from land to water and will ensure a safe relaxing environment.

PVC Ambulators Features

Different styles of these ambulators have different features so we will go over different styles. Some ambulators like the outrigger PVC walker is great for at the pool or in the shower because this walker comes with extra stability at the base by having to outer bars on the outside go out and down making the wheels lock easier. Some ambulators have a single strap for extra support for the PVC ambulator user, ensuring that they cannot slide down and out of the chair. These chairs come in all different sizes including bariatric options; they also have many different vinyl colors.
