Combination Grab Bar

The combination grab bar offers horizontal and vertical use in one grab bar and are excellent for walls with limited space. Grab bars are now considered a necessity for every bathing area. It is suggested that both a vertical and horizontal bar be provided; the horizontal for pulling oneself safely out of a sitting position and the vertical for stability.

All Grab Bars are made with stainless steel and come in 1 1/2" diameter. All Grab Bars have 14-gauge thick, 3" diameter ends. Strong yet flexes slightly during installation to reduce the possibility of tile cracking. 1 1/2" space between wall and grab bar. ADA approved.
